

## Special Smiles Program

Serving adults and children with developmental, cognitive, and physical disabilities, this program is designed to address a gap in access to dental services for individuals with special health needs. Both of our clinics include a special treatment room to provide care in an inclusive, quality and compassionate setting. Our clinicians receive specific training to support the physical, emotional and sensory needs of these patients. This program also includes a partnership with Children's Hospital of Wisconsin to support special needs adults who have aged out of their pediatric dental program.

## Eligibility Requirements

- Have BadgerCare/Forward Health/Medicaid insurance OR are uninsured and have income that falls below 200% of the Federal Poverty Guidelines.
- Reside in Milwaukee County, Ozaukee County, Waukesha County or Washington County.
- Have a special health need.
